MESH & NETTING

All Mesh Bags

100% mesh bag, full ventilation.

1 lb to 7 lb
Weight range

Poly
Material

Automatic wicket bag...
Packing systems

Natural transpirability
Properties

PRODUCT INFORMATION

100% mesh bag, full ventilation.

Air on every side. It is the long-standing format in the field because freshly cut product gives off moisture and heat, and in mesh it neither condenses nor suffocates. Closed with clip, stitch or seal, depending on each operation's equipment.

RUNS ON

Automatic wicket bag systems. Closed with clip, stitch or seal, depending on what your operation already runs.

WORKS GREAT FOR

- **Onion**
  The default onion pack in most of the world.
- **Potato**
  Potatoes need air and darkness.
- **Lime**
  Limes are packed warm from the field and travel far.
- **Citrus**
  Oranges and grapefruit in volume.
- **Seafood**
  In the industrial version, shellfish and similar product that has to drain and breathe while it is handled wet.
- **Firewood**
  The same construction in a heavier gauge carries firewood and bulk product that has to dry rather than sweat in the bag.
