RETAIL BAGS

Combo Bags

Mesh bag with one face of printed film.

1 lb to 10 lb	Poly	Kwik Lok	Automatic wicket...
Weight range	Construction	Closures	Packing systems

PRODUCT INFORMATION

Mesh bag with one face of printed film.

The film face gives you the large print area and the mesh lets air through. It is the middle ground between straight mesh, which barely prints, and polyethylene, which does not breathe. Used for product that needs ventilation but also has to be seen on the shelf.

RUNS ON

Automatic wicket baggers. Closes with Kwik Lok or traditional packing systems, and ships as a finished bag ready to pack and close.

WORKS GREAT FOR

- **Potato**
  The format most retail potato programmes settle on.
- **Onion**
  Onions need air at the neck and a retailer needs a printed panel.
- **Citrus**
  For oranges and mandarins sold as a branded retail pack, the film face takes photographic artwork and the mesh window shows...
- **Garlic**
  Garlic is bought on appearance and sold in small counts.
