COMPOSTABLE

Compostable Net Tubes

Certified compostable net tube, same format as the standard tube bag.

Tested according to...
Standard

100% biobased - starch
Material

0.5 lb to 4 lb
Bag capacity

3" to 17" tubular
Net opening

PRODUCT INFORMATION

Certified compostable net tube, same format as the standard tube bag.

Same roll, same machine, same operation - what changes is the material. Used when the chain asks for compostable packaging in writing and you do not want to move your line to comply. The certification goes with the order.

RUNS ON

The same clipping and sealing equipment as a conventional tube bag. Net opening runs 3" to 17" tubular, at 12 to 20 g per metre.

WORKS GREAT FOR

- **Export citrus**
  The usual case: a European or Canadian chain adds a packaging requirement mid-season and the pack has to change without the...
- **Onion and potato programmes**
  Where the retailer's sustainability commitment covers the bag as well as the tray, the compostable tube replaces the...
- **Small-count retail packs**
  Bag capacities run from 0.5 lb to 4 lb, which covers most of the counts sold as branded retail packs.
