Print

**Biodegradable**
Net options

**Carousel machine**
Packing systems

## PRODUCT INFORMATION

### Printed header bag for peg display, in mesh, poly or both.

The header is the part people see when the bag hangs, and everything fits on it: logo, photo, weight, barcode. That is why it is the format for anyone selling in store who needs their brand read from a distance. We build it in mesh, in polyethylene, or combining the two, depending on how much air the product needs. The most common presentations are 2, 3 and 5 lb.

#### RUNS ON

Carousel machines, wicket systems and hand packing. If your line already runs wicketed bags, header bags drop into the same operation.

## WORKS GREAT FOR

- **Lime**
  Limes move fast and bruise at the stem end.
- **Onion**
  Onions need ventilation more than almost anything else on the shelf: trapped moisture at the neck is what starts the rot.
- **Potato**
  Potatoes green under light and sweat in plastic.
- **Avocado**
  Avocado is sold by count and handled repeatedly before it reaches the shopper.
- **Citrus**
  Oranges, mandarins and grapefruit are bought on colour.

## SPECIFICATIONS

| | |
|---|---|
| **Weight range** | 1/2 lb to 10 lb |
| **Print** | Up to 8 colors, high-end |
| **Net options** | Biodegradable, memory, soft or extruded |
