MESH & NETTING

Heat Sealed Mesh

Mesh closed with a heat seal - no stitching, no staple.

Blue
Mesh colors

8" to 24" opening - white
Plastic mesh

Heat seal - no stitching
Closure

PRODUCT INFORMATION

Mesh closed with a heat seal - no stitching, no staple.

Instead of sewing or stapling, the closure is made with heat. It comes out even, with no loose threads and no metal, which is what several chains no longer want in the bag. On the line you notice it in consumables and stoppages: no thread to run out, no staple to jam.

RUNS ON

Mesh available in blue, green, camel, yellow, orange, red, purple, black and white. Plastic mesh runs 8" to 24" opening in white, yellow, purple, red and blue.

WORKS GREAT FOR

- **Citrus**
  Export citrus programmes where the receiving chain audits the pack.
- **Onion**
  Onion lines running long shifts, where a staple jam costs more in downtime than the closure costs in material.
- **Potato**
  Retail potato packs for chains that specify no metal fasteners in the packaging.
- **Avocado**
  Avocado is handled repeatedly and inspected closely.

SPECIFICATIONS

Mesh colors	Blue, green, camel, yellow, orange, red, purple, black, white
Plastic mesh	8" to 24" opening - white, yellow, purple, red, blue
Closure	Heat seal - no stitching, no staple
