MESH & NETTING

Knitted Net (Soft Woven)

Elastic knitted net for delicate product.

Dark green
Mesh colors

Knitted soft-woven net
Construction

Avocado
Best for

PRODUCT INFORMATION

Elastic knitted net for delicate product.

Unlike extruded net, knitted net stretches and settles around the shape of the fruit, so it leaves no mark on the skin. That is why it is used on product that gets handled a lot, and where one mark is worth a rejection.

RUNS ON

Supplied in dark green, green, camel, yellow, orange, red, purple, black and white.

WORKS GREAT FOR

- **Avocado**
  Avocado skin marks under pressure and the mark does not go away.
- **Mango**
  Mangos are packed at different ripeness stages and keep changing shape in the pack.
- **Fine export citrus**
  Premium citrus sold on appearance, where the buyer is grading the skin as well as the fruit.

SPECIFICATIONS
