EE Print Pack
30 YEARS

COMPOSTABLE

Memory Net

Soft, adjustable extruded net - compostable.

Extruded net
Construction

Compostable
End of life

High breathability
Properties

Garlic
Typical uses

PRODUCT INFORMATION

Soft, adjustable extruded net - compostable.

Extruded net that gives and then holds, so it settles around whatever it carries instead of forcing the shape. Soft enough for produce that bruises, and compostable.

RUNS ON

Soft, adjustable extruded net, supplied to the count and opening your programme runs.

WORKS GREAT FOR

- **Garlic**
  Garlic is sold in small counts and bought on appearance.
- **Limes**
  Small-count lime packs for retail, where the net has to hold three or four pieces without marking the skin.
- **Shallots**
  The same case as garlic: small, delicate, sold by count, and judged on how the skin looks in the pack.
- **Tangerines**
  Easy-peel citrus in count packs, where a firm net leaves a grid pattern on soft skin and a memory net does not.
- **Figs and mango**
  Fruit that bruises if the pack does not give.
