| Capacity | Material | Closure | Ventilation |

## PRODUCT INFORMATION

### Paper-based tray format, an alternative to foam and rigid plastic.

Paper tray packaging for produce and food applications moving off foam or rigid plastic trays without giving up shelf presentation.

### RUNS ON

Top seal, manual or automatic. Supplied in 4 oz and 6 oz capacities, in paper cardboard with a food-grade coated finish and ventilation holes.

## WORKS GREAT FOR

- **Produce trays**
  Small counts sold on a tray with a sealed top film - the presentation retail uses when the product is premium and has to be...
- **Food service**
  Portioned counts for food-service programmes, where the tray has to hold up through service rather than just through display.
