Kwik Lok
Closures

Finger punch
Handling

PRODUCT INFORMATION

Printed polyethylene bag, perforated.

Polyethylene gives the best print, because the whole surface is printable area, and the perforation solves the air. Used where the image carries the weight and the product tolerates some moisture.

RUNS ON

Closes with Kwik Lok, tape or a knot. Supplied with a finger punch or a handle at the top, depending on how the pack is displayed.

WORKS GREAT FOR

- **Apple**
  Apples hold up well in film and sell on appearance.
- **Corn**
  Corn is bought on freshness cues - the husk, the silk.
- **Chili**
  Chiles are sold by variety and heat level, which is a lot of information to print.
- **Citrus**
  Where a retail programme wants a high-impact printed bag rather than mesh, perforated poly carries photographic artwork...

SPECIFICATIONS

Weight range	1 lb to 10 lb
Print	High-end printed poly label
Closures	Kwik Lok, tape, knot
Handling	Finger punch or handle at the top
