RETAIL BAGS

Tube Bags

Continuous mesh roll for lines that pack by volume.

1 lb to 7 lb	Non-woven mesh	9 standard colors	Film label printed one
Weight range	Material	Colors	Print

PRODUCT INFORMATION

Continuous mesh roll for lines that pack by volume.

The mesh arrives on a roll and the machine cuts, fills and closes it without anyone feeding bags one by one. This is what you use when the problem is getting the shift out: fewer stoppages, fewer people on the line. It runs on clipping and automatic sealing equipment.

RUNS ON

Clipping equipment and automatic sealing lines. The roll replaces pre-made bags entirely, so the bottleneck moves off the operator and onto the machine.

WORKS GREAT FOR

- **Onion**
  High-volume onion lines are where tube bags earn their place.
- **Potato**
  Potato packers running by weight rather than by count get the most out of a continuous roll: the machine sets the length, so...
- **Citrus**
  For oranges and mandarins moving in volume through a consolidation centre, the tube runs at line speed and the printed film...
- **Soft-skin produce**
  The mesh is non-woven, made with CLAF(R) technology from JX Nippon ANCI, which is why it suits product whose skin marks...

SPECIFICATIONS

Weight range	1 lb to 7 lb
Material	Non-woven mesh, CLAF(R) technology (JX Nippon ANCI)
Colors	9 standard colors
Print	Film label printed one or both sides
Best for	Soft-skin produce
